

Life Without A Crutch Training Program

The Life Without a Crutch training package provides a valuable catalyst to promote recognition of addiction. In a simple, orderly process, it brings the client face-to-face with the impact of his or her dependent behavior and the personal rewards for accepting responsibility and taking action. This approach prepares the addicted client to participate successfully in the wide variety of treatment modalities, and thus makes the best use of limited staff availability, treatment time, and program funds.

***One unit consists of Trainer's Manual,
audio cassette, 15 copies of student text***

List Price \$995.00 per program unit

Contact OPEN for quantity discount information.

"Life Without a Crutch is a well-written program, clear, concise, and easily presented. The client readily accepts the concept that it is not a question of whether the addiction behavior is good or bad, moral or immoral, legal or illegal, but that the destructive nature of the addiction itself is a problem."

— Brian Hendrix,
Executive Director,
Payne County (Oklahoma) Drug Court, Inc.

"The Life Without A Crutch program has been interwoven into the initial phase of our intensive outpatient program. The material enhances the impact of our format by confronting denial, increasing motivation and stimulating participation in the recovery process."

— Kay Heinrich,
Corrections Program Manager
for Chemical Dependency,
CD Program Staff Headquarters- East,
Washington State Department of
Corrections Headquarters
